AMF Strategifond Global

ISIN: SE0018067860

The Fund is managed by AMF Fonder AB, corporate identity number 556549-2922, a subsidiary of AMF Tjänstepension AB

OBJECTIVES AND INVESTMENT POLICY

The fund is a special feeder fund and invests the majority of its capital in AMF Aktiefond Global (minimum 85 per cent) and uses loans for the purpose of generating leverage. The special feeder fund will primarily invest in AMF Aktiefond Global but may also choose to invest in other funds managed by AMF Fonder. The fund may make investments in derivatives and in cash. Equity and/or fixed income investments made by the master fund and other underlying funds have investment policies covering a wide range of financial markets.

The special feeder fund's objective is to provide a long-term return exceeding its benchmark by using leverage and maintaining risk diversification.

The fund is actively managed. Deviations from its benchmark may vary over time, please refer to the fund's annual report and prospectus for actual historical variations.

Equity, asset class and regional exposure (as applicable) may vary depending on the fund manager's assessment and always in relation to the fund's risk limits.

The fund is subject to certain sustainability criteria. Please refer to AMF Fonder's website or the fund's prospectus for a comprehensive report on sustainable investments.

We compare the fund's performance with the benchmark MSCI ACWI ESG Leaders NR.

The fund does not distribute dividends.

Units can normally be bought and sold on any working day. Days on which trading cannot take place are shown in the fund's trading calendar, available at www.amf.se/fonder.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

RISK AND REWARD PROFILE

The risk/reward indicator illustrates the trade-off between risk and potential returns when investing in the fund. The indicator is based on how the fund's value has fluctuated over the past five years.

This fund is in risk category 6, which entails a high risk of both increases and decreases in unit value. Category 1 does not mean that a fund is risk-free. A fund may move along the scale over time, to both the right and the left. This is because the indicator is based on historical data, which are no guarantee of future risks/rewards.

The risk scale illustrates the level of exposure to the fund's most significant risks. It does not illustrate the risk of:

The risk scale illustrates the level of exposure to the fund's most significant risks. It does not illustrate the risk of:

Liquidity risk: occurs if a part of the funds assets are difficult to sell at a certain point of time or at a reasonable price.

Credit risks: The risk of loss due to the failure of an issuer of a interest bearing instrument to pay interest or repay the nominal value.

Operational risks: Delays and errors in processes, political decisions, official decisions and so on may impact negatively on the fund.

Impact of financial techniques: Derivative instruments may be used for investment purposes, which may increase the fund's risk levels. The fund may also use loans for the purpose of generating leverage, which may increase the fund's risk levels.
